

The Herschel Comfort Colour infrared heating panels are made in the UK and bring all the benefits of our Comfort white infrared panels from a world of beautiful colour. The Comfort Colour panels are available in a stunning collection of specially selected on trend colours to blend perfectly into any interior. If you would like to colour match to a RAL colour that is not listed, to match your room décor, we also offer other bespoke colours. Please contact us to discuss options.

Painted to the highest standard in the UK, the Comfort can be wall or ceiling-mounted.

The Comfort Colour infrared heating panels feature Herschel's innovative Swift Comfort Plus system and Radiant Reflective back, offering a much faster warm-up and reducing rearward heat loss by over 20%. Combining sustainability, performance and style, the Herschel Comfort Colour panels provide a designer finish to any living environment and radiate an unrivalled level of comfort with their warmth.

With 10 year warranty & 100% recyclable packaging, we have also ensured Comfort Colour is fully repairable. Use with your choice of iQ control.

Installation	Wall or ceiling mounted
Certificates	
Warranty	10 years
Ebodied Carbon	24 - 94kgCo2e for 215 - 1250W panels respectively

### Important

The Comfort panel comes with one central fixing bracket for secure, simple mounting. When installed, the front of the panel will extend a total of 5.5 cm from the wall. The panel will radiate heat into the room and will perform best when mounted in a position free of any direct obstructions such as a sofa. The panel will need to be wired into the mains and this should be carried out by a suitably qualified electrician. Always refer to installation instructions before installation.

Choose from a range of stylish, on trend colours for your Comfort Colour panel.
